## Professional Summary

Computer Science Engineering graduate with strong knowledge of Java, OOP, SQL, Data Structures and Algorithms. Hands-on experience developing web applications using JSP, Servlets, JDBC, MySQL, React.js, Python, and Firebase. Skilled in CRUD, DAO, authentication, session management, database integration, and problem-solving.

## Internships

**EDUNET FOUNDATION** May 2024 - Aug 2024

- Analyzed used-car pricing data to identify key factors influencing vehicle prices and customer purchasing trends.
- Performed data preprocessing, analysis, and model development to predict used-car prices.
- Created visual reports and charts to communicate trends, patterns, and data-driven insights for better decision-making.

**Salesforce Trailhead – Data Cloud Training** Jul 2025 – Nov 2025

- Gained hands-on learning experience with Salesforce Data Cloud concepts, including data collection, organization, integration, and real-time data management.
- Studied how connected customer data can be used to understand customer behavior and support personalized business experiences.
- Developed understanding of data integration and customer data management concepts in a cloud environment.

## Projects

**Resume Analyzer (AI-powered Web Application)** 2025

- Developed an AI-powered web application using React.js, Python, and Firebase to extract resume information and match candidate skills with job requirements.
- Implemented a microservices-based backend architecture to support scalable server communication and efficient data processing.
- Used React Hooks including `useMemo` to optimize application performance and improve responsiveness.
- Implemented protected routes and authentication-based access control to improve application security.

**Online Quiz Management System — Java, JSP, Servlets, JDBC, MySQL** 2026

- Developed a role-based online quiz management system using Java, JSP, Servlets, JDBC, and MySQL.
- Implemented student registration and login, admin question management, MCQ-based quizzes, automatic score calculation, and result tracking.
- Designed DAO-based database integration using JDBC and MySQL for efficient data access and management.
- Implemented session management and role-based access control for student and administrator functionality.
- Developed dashboards to display previous scores, best scores, and total quiz attempts.

## Certifications

**Amazon Web Services (AWS) Fundamentals Specialization** – Coursera, 2024

## Education

**B.Tech (CSE) – SRM University AP (CGPA:7)** 2022 – 2026(May)

**XII – Narayana JR College (Percentage:70.01)** 2020 – 2022

**X – Narayana EM High School (Percentage:99.9)** 2019 – 2020

## Skills

**Programming Languages:** Java, C, C++, SQL

**Java Technologies:** OOP, Collections, Exception Handling, Multithreading, JDBC, JSP, Servlets, DAO

**Web Technologies:** HTML, CSS, JavaScript, React.js, Bootstrap

**Database:** MySQL, SQL, Database Management Systems (DBMS)

**Core Concepts:** Data Structures and Algorithms, Object-Oriented Programming, Software Development, SDLC

**Tools:** Git, GitHub
